

## Orthomate All Terrain Knee Scooter with pneumatic tyres

Note: Cupholder sold separately

The Orthomate Knee Scooter is a versatile all terrain scooter with pneumatic tyres, perfect for navigating all surfaces to give you a safe, smooth and comfortable ride indoors/outdoors.

It is an all terrain version of our regular StrideOn Knee Walker to help you stay outdoors and increase your freedom of movement without pain, fatigue and discomfort as a result of a lower leg injury.

The Orthomate allows users to stand comfortably without stress to their hands, arms or shoulders and balances weight naturally on both legs. The extra long padded cushion is comfortable to kneel on and allows you to keep your injured foot elevated and safe from further injury.

The Orthomate lets you stay mobile and get on with your life.

# Orthomate All Terrain Knee Scooter

## Features

### Height adjustable handle bars

Adjust the height of the handle bars for a perfect fit in seconds.

### Suitable for all lower leg injuries

- ✓ Ruptured Achilles Tendon
- ✓ Broken Ankle or Foot
- ✓ Amputation of Lower Leg
- ✓ Sprained Ankle
- ✓ Gout
- ✓ Bunions
- ✓ Diabetic Ulcers
- ✓ Fractured Heel

### Contoured knee pad

An extra long deeply cushioned knee pad ensures a comfortable ride.

### Height adjustable knee pad

Allows you to stand normally with your weight evenly distributed. Uniquely adjustable for either right or left leg injuries.

### Ergonomic and light weight

The light aluminium weight frame is designed to give you total stability.

### Brakes and safety

The Orthomate is safe and stable with an easy to use push button braking system, that can be set to lock for hands free use on a flat surface.

### Guaranteed to carry your weight

The unit is designed to carry persons up to 159kg.

### Made for indoors and outdoors

The Orthomate has been designed for those who like the outdoors and use rougher surfaces while still suitable for indoors use.

### Fully collapsible

The Orthomate is compact and easy to fold, making it ideal for the car, or for storage when not in use.

### Wheel and tyres

Pneumatic tyres give a smooth and comfortable ride over rough outdoor surfaces.
